

ENVIRONMENTAL POLICY STATEMENT

Pulse Printing Products is committed to ensuring that the human and natural environment with which we interact as a company is protected both today and into the future as we continue to use resources in managing our business. We will achieve this through the efficient use of these resources, preventing pollution, minimising waste and the promotion of recycling.

This environmental policy statement complements the company's business objectives in supporting sustainable development and applies to all manufacturing and processing operations within the company and is achieved by each individual department.

Pulse Printing Products is committed to complying with the environmental management system ISO 14001:2015 and continually review and improve its requirements. We are acknowledging that the continuous improvement in our environmental performance is fundamental to the company business strategy.

Pulse is committed to compliance obligation and any changes in them will be implemented accordingly in an efficient manner. We operate production manufacturing in compliance with the permits granted and regulations that apply to them.

Our environmental impacts are considered and judged when developing new products and processes. We seek to continuously improve our environmental performance and energy efficiency by regular internal and external audits, management reviews, monitoring of VOC emissions, production of waste and usage of energy and water. We have set of environmental objectives which are reviewed yearly or when required.

Pulse Printing Products has and will continue to support and work actively with suppliers and customers in creating closer relationships in order to have acceptable commitments from them to adhere to this policy on environment. We will continue to work closely with customers to help each other in achieving mutual targets on sustainability.

We are communicating and will continue to communicate transparently on our environmental data and impacts in support of supplier and customer development.

Gary Sheppard
Managing Director
