

PULSE RESEARCH AND DEVELOPMENT POLICY

Pulse Printing Product is a specialist company in the manufacture, sales and technical support of printing inks, coatings, adhesives, solvents, and general consumable products used in various printing processes.

Pulse sees research and development activity as significant to our success. It is organised into projects that address the priorities and needs of the ink, coating, and printing industry.

Our main aim is to offer innovation in our strategic product area of UV curable and Water based coatings for the graphic arts market. We use the latest technology, raw materials and production techniques for the research, development, and manufacture of our products.

Pulse meets the terms of compliance obligation during research and development of new products and techniques including Quality Management System ISO 9001:2015, EuPIA Good Manufacturing Practice 4th version March 2016, Occupational Health, and Safety Management System ISO 45001:2018 and Environmental Management System ISO 14001:2015.

We perceive research and development as key and driver to build partnerships with customers and suppliers to realise the potential of new coatings developments within industry.

Gary Sheppard
Managing Director
